

A short course in the Economics of Religion, using *Radical, Religious and Violent*

The book was written based on my experience teaching the material in college classes and presenting it in public lectures, and so it is designed to be nontechnical in nature. That said, it is not designed to be a text. The website contains chapter questions. Answers are available to instructors who send a request to elib@ucsd.edu from their campus email address, together with a link to their campus website.

This *sample syllabus* on the Economics of Religion, based on the book, might look like this. It is based on my experience teaching this material in classes on economic growth, labor economics and the economics of the Middle East.

This syllabus is far from comprehensive. For a general introduction I recommend:

Iannaccone, Laurence R. "Introduction to the Economics of Religion," *Journal of Economic Literature*, XXXVI (1998), 1465-1496.

Barro, R. and R. McCleary, "Religion and Economy," *Journal of Economic Perspectives*, Spring 2006.

Iannaccone, Laurence R. and Eli Berman. "religion, economics of." *The New Palgrave Dictionary of Economics*. Second Edition. Eds. Steven N. Durlauf and Lawrence E. Blume. Palgrave Macmillan, 2008.

A short list of current readings from the press is available upon request . It can be followed on Twitter (clubmodel). Discussion of the book is collected at www.radicalreligiousandviolent.com .
